

Statement Bisphenol A and S

- Fiskeby Board AB, Fiskeby mill, follows and analyses our product according to the German recommendations BfR XXXVI – Paper and Board for food contact – which have full acceptance in our markets. Both Multiboard® and Multiboard® Barrier products complies under normal and foreseeable modes of application the Recommendations XXXVI as well as current EC Directives regarding migration and may stand in direct contact with dry, moist and fatty foodstuffs.
- Multiboard and Multiboard Barrier also fulfil the demands laid down in the framework regulation EC 1935/2004, regarding materials and articles intended to come into contact with food.
- We can confirm that we do not use any, or intentionally add any chemicals with bisphenol A in the manufacturing process of Multiboard® or Multiboard® Barrier qualities. All chemicals added comply with the German recommendations BfR regulation XXXVI.
- The present of Bisphenol A in Multiboard and Multiboard Barrier has continuously, since the end of 2002 been analysed by a third part institute in Germany - the ISEGA Institute. The determination is performed according to the DIN EN 15136, by HPLC. Regarding Bisphenol A we fulfil the requirements laid down in the BfR regulation (max. 0, 6 mg/kg foodstuff). Bisphenol S is not determinable.
